THE BIDEN ADMINISTRATION IS WEAKENING OUR MILITARY READINESS

(Columbus) – Frank LaRose, the Republican front-runner in the U.S. Senate race and Army special forces combat veteran, issued the following statement today on the Biden administration weakening our military readiness:

"Elite military units and the warriors within them can't be mass produced quickly to meet conflicts as they arise around the globe. But the Biden administration is poised to repeat mistakes of the past with a shortsighted plan to cut special-operations forces, including the Green Berets. This will weaken our military preparedness and lower morale at a time when our country faces grave threats from China, Russia, and the drug cartels that are running rampant under the Biden administration. I know firsthand how important these highly trained unconventional warriors are to our country. Our SOF forces are among the most efficient and effective components of our nation's arsenal. When I am elected as the first Green Beret to ever serve in the US Senate I will fight to preserve and strengthen our special operations forces."
